#### **DETAILED ACTION**

### **Double Patenting**

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 2, 11, 12 and 21-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 22, and 23 of U.S. Patent No. 6,327,311. Although the conflicting claims are not identical, they are not patentably distinct from each other because communications over the UWB wireless transmission channel is well known in the art.

The corresponding of claims is as follow:

Claim 1 of U.S. Patent No. 6,327,311 to claims 1, 2, 11, 12 and 26 of the instant application;

Claim 2 of U.S. Patent No. 6,327,311 to claim 21 of the instant application;

Application/Control Number: 10/822,595

Art Unit: 2611

Claim 22 of U.S. Patent No. 6,327,311 to claims 22, 23 and 25 of the instant application; and

Page 3

Claim 23 of U.S. Patent No. 6,327,311 to claim 24 of the instant application.

The different between the claims as listed above is that the claims of the instant application include communications over the UWB wireless transmission channel. However, communications over the UWB wireless transmission channel is well known in the art of digital communications and it is obvious to modify the method and apparatus as claimed in the U.S. Patent No. 6,327,311 to communicate over the UWB wireless transmission channel since it would not involve any inventive feature.

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 4-6 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitations of "said second passband single carrier transmitter" and "said second piconet" recited in claim 4, lines 3 and 4 lack antecedent basis.

Similar problems exist for the same recitations recited in claim 14, lines 4 and 5.

Page 4

The recitation of "said first piconet" recited in claim 5, line 2 lacks antecedent basis. Similar problem exists for the same recitation recited in claim 15, line 2.

The recitation of "said first piconet" recited in claim 6, line 2 lacks antecedent basis. Similar problem exists for the same recitation recited in claim 16, lines 3-4.

It appears that the dependency of claims 4-6 and 14-16 are in error which results lack of antecedent basis as noted above. For example, claim 4 should have been dependent from claim 3 since it is further limiting the recitation of claim 3. Should the dependency of claim 4 is changed to claim 3; the antecedent basis problem will be fixed. Similar suggestion is for claims 5, 6 and 14-16.

# Allowable Subject Matter

- Claims 3, 7-10, 13 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- Claims 4-6 and 14-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### Conclusion

Page 5

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Melick et al (US 2005/0240607) and Linebarger et al (US 7,035,663) are cited because they are pertinent to UWB communication system.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on Mon-Fri (9:00AM - 6:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information, system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
